Sepsis e-Learning

Understand. Identify. Act. Save Lives.

- CPD Accredited
- Aligned with NICE Guidelines NG51 (2024)
- Updated regularly by The UK Sepsis Trust
- New for 2025: Inclusivity of assessment (identifying sepsis-related rashes on non-White skin)
- New for 2025: Identifying sepsis in vulnerable populations (i.e. 'soft signs of sepsis')

Empowering clinicians, care workers, support staff, and the general public with critical, life-saving knowledge.

Why Sepsis Education Matters

Sepsis is a life-threatening condition that can affect anyone. Early recognition and intervention saves lives – but many frontline professionals lack the tools to act quickly and confidently.

The UK Sepsis Trust and escalla have partnered to deliver impactful, CPD-accredited e-Learning that aligns with NICE NG51 (2024) and is regularly updated by Dr Ron Daniels and the UKST team to include new guidance and to incorporate changes as a result of learner feedback.

New for 2025:

- ✓ Soft signs training to support early identification, especially in individuals who communicate differently
- ✓ Inclusive visual guidance to assist identifying sepsis in non-White skin tones
- ✓ Interactive glossary for non-clinicians

"This will go some way to reducing healthcare bias and delayed diagnosis." – Natalie Rainey, NHS

Modules Coming Soon in 2025:

- ✓ Sepsis in Maternity
- ✓ Sepsis in Vulnerable Populations

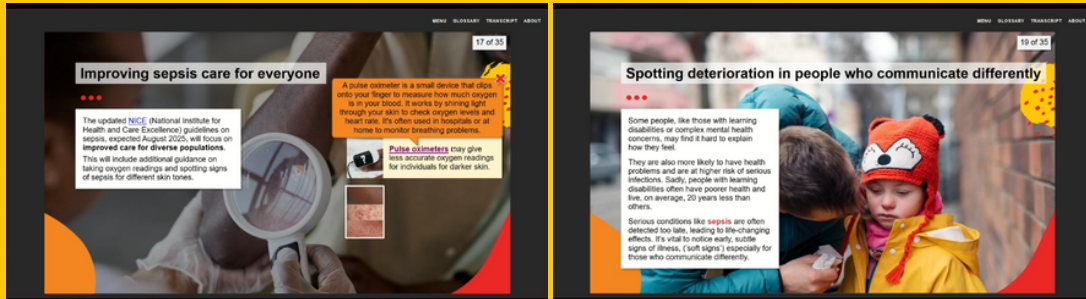

"There has never been a better time to update your sepsis learning."

Introduction to Sepsis module

Perfect for. All clinicians, health workers, and anyone interested in learning more about sepsis.

A powerful, accessible, introduction to sepsis recognition with real-life video case studies for greater impact.

Objectives:

- Define sepsis
- List the causes of sepsis
- Recognise the signs of sepsis
- Outline the key risk factors in adults and children
- Summarise key information and required actions

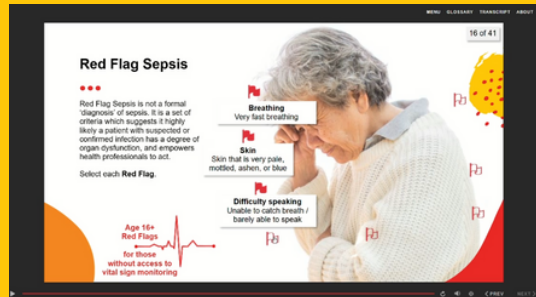

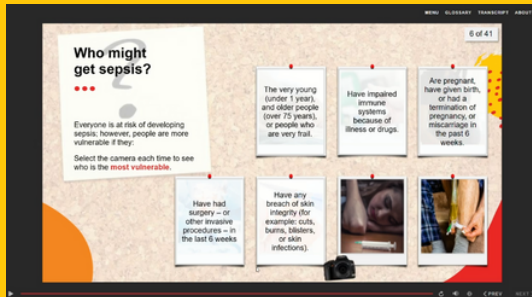

2025 Updates:

- ✓ In-depth on-slide glossary of medical terms
- ✓ Introduces inclusive rash identification guidance
- ✓ Supports sepsis identification in those with diverse communication needs

Sepsis: A Care Worker's Guide module

Perfect for. Care or support workers within a care role or community setting.

Designed to build fast, confident responses in frontline carers.

Objectives:

- Identify common causes
- Outline the risk factors
- Recognise the Red and Amber Flag signs
- Choose appropriate escalation of care

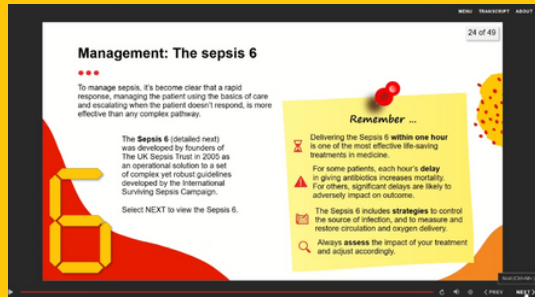

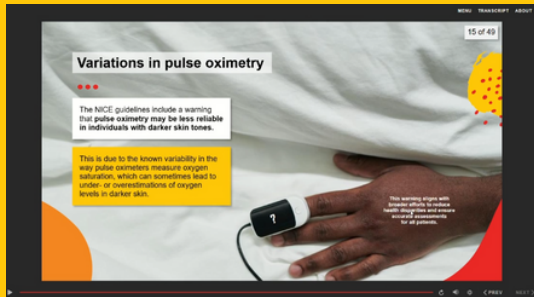

2025 Updates:

- ✓ In-depth on-slide glossary of medical terms
- ✓ Diversity-focused detection, including inclusive visual of sepsis-related rashes on non-White skin
- ✓ Detailed breakdown of 'soft signs' of sepsis to assist sepsis identification in those with diverse communication needs
- ✓ NG51 guidance fully integrated

Sepsis in Adults module

Perfect for. Clinicians and health professionals working with adults

Detailed face-to-face assessment and risk stratification guidance with access to screening tools and treatment pathway information for robust clinical application.

Objectives:

- Identify common causes of sepsis
- Outline the risk factors for adults
- Recognise the Red and Amber Flag signs
- Recognise and describe the diagnosis, management, and treatment of adults with sepsis

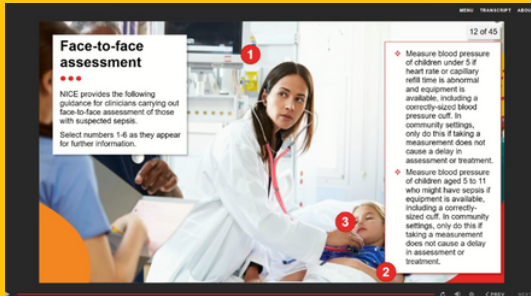

2025 Updates:

- ✓ Diversity-focused detection, including inclusive visual of sepsis-related rashes on non-White skin
- ✓ Detailed breakdown of 'soft signs' of sepsis to assist sepsis identification in those with diverse communication needs
- ✓ NG51 guidance fully integrated

Sepsis in Children module

Perfect for. Clinicians and health professionals working with children

Equips paediatric teams with life-saving knowledge and providing Red and Amber flag detail and related screening tools in line with either the NICE NG51 guidelines or National PEWS as required.

Objectives:

- Identify common causes
- Outline the risk factors for children
- Recognise the Red and Amber Flag signs
- Recognise and describe the diagnosis, management, and treatment of sepsis

2025 Updates:

- ✓ Diversity-focused detection, including inclusive visual of sepsis-related rashes on non-White skin
- ✓ Detailed breakdown of 'soft signs' of sepsis to assist sepsis identification in those with diverse communication needs
- ✓ NG51 guidance fully integrated

Flexible Access to Fit Your Organisation

Have your own LMS?

- Annual licence
- HTML5 content, SCORM/xAPI formats
- Compatible with PCs and tablets
- Bespoke options available

No LMS or fewer than 100 users?

- Pay-As-You-Go option available
- Central LMS access via escalla
- Track progress and print certificates
